ATTENTION ACCIDENT VICTIM:

FIVE DEADLY SINS THAT CAN WRECK YOUR ACCIDENT CLAIM

1. *Assuming the insurance company is on your side.* Insurance companies are in the business of making money, and don't like to pay money out. **The insurance company does not care about you** or take your case seriously until you show them you mean business. The way to do that is to hire an attorney to help you.
2. *Giving the insurance company a recorded statement.* You never want to do this. Even you have already given a recorded statement, ***we can help undo any damage*** the recorded statement may do to your claim.
3. *Hiring just any lawyer.* The choice of which lawyer to hire is a big one. Don't take it lightly.
4. *Waiting to take action.* There is nothing worse than waiting to take action after your accident. Time is your worst enemy with these cases. Don't make the situation you are already in any worse.
5. *Not getting medical treatment.* If you are injured, getting prompt medical attention is important. If you are injured and don't get medical treatment, the insurance company will think you were not injured because there are no medical records to prove you were in fact injured.

For more information on how you can avoid even more DEADLY sins, call us now at 617 338 7400 to learn more ways you can protect yourself, and your claim, after your accident.
